WORK EXPERIENCE

Interbiz Consulting (July 2018 - At present)
Software Engineer

Projects:

- Brewer Integration (Jun 2018 – Nov 2018)
- EDI Integration (Jun 2019 – Feb 2020)
- Brewer Utilities(Jan 2020 – on going)

PROJECTS

Brewer Utilities - ASP.Net, Angular 7, SQL
Software Requirement: Visual Studio, SQL Server Management Studio 2016, IIS server
Role: Team lead, Developer

The project is developed for the brewer company employees to track the field job tasks status and maintain task details, job requirements, supervisor details etc. The application is used in different locations of Arizona(USA).

EDI Integration - .Net, EDI, SQL
Software Requirement: Visual Studio, SQL Server Management Studio 2016, Task Scheduler
Role: Developer

EDI Integration Project integrates Brewer's Medallion database and their vendor's EDI system by using EDI files. The application exchanges and fetches data using standard EDI files.

Brewer Integration - .Net, XML, SQL
Software Requirement: Visual Studio, SQL Server Management Studio 201, Task Scheduler
Role: Developer

Brewer integration project integrates Hyphen Solutions SupplyPro cloud-based system and Brewer's Medallion database. The integration program runs automatically using a task scheduler, connects to the Hyphen FTP server, downloads and parses XML file and stores data in the Brewer's Medallion system.
